Rathbone Ethical Bond Fund Income Sub-Fund (L-Class EUR)

A sub-fund of the Rathbone Luxembourg Funds SICAV
Management Company: FundRock Management Company S.A.
Income shares ISIN: LU1396461425

Objectives and investment policy

The sub-fund's objective is to seek regular, above-average income. Under normal circumstances, the sub-fund invests mainly in bonds and bond market instruments that meet strict ethical and financial criteria.

The sub-fund may also invest in other securities permitted by UCITS regulations. The sub-fund may use investment techniques and derivatives for efficient portfolio management (including hedging).

The sub-fund is managed at the fund manager's discretion without reference to any benchmark. The manager uses its own analysis to identify those individual bonds that can offer the best overall combination of price, risk, income and also meet established ethical standards.

Designed for: Investors who understand the sub-fund risks, want an investment that focuses on income, and intend to invest their money for at least five years.

You can buy and sell units on each business day of the sub-fund between 9am and 5pm Luxembourg time.

This sub-fund offers income shares (shares in which any income received in the sub-fund will be paid to the shareholder). A further sub-fund (in which any income payable by the sub-fund is re-invested) is also offered.

Terms to understand

Bonds: Securities that represent an obligation to repay a debt, along with interest.

Derivatives: Financial instruments whose value is linked to one or more rates, indices, share prices or other values.

Hedging: Using techniques to partially cancel out risks.

Risk and reward profile

This indicator is a measure of the sub-fund's past volatility (the extent and rapidity of up-and-down movements of the value of an investment). It may not be a reliable indication of the sub-fund's future risk. The risk category shown is not a target or a guarantee and may change over time.

The risk indicator for this sub-fund reflects the following:

- The emphasis on income helps the manager to maintain a moderate risk profile for the sub-fund.
- As this share class is less than five years old, the indicator is not based solely on actual performance for the class.

The value of investments in the sub-fund and the income from them may go down as well as up and you may not get back your original investment when you sell your units.

During unusual market conditions, the risks normally experienced by the sub-fund may increase significantly, and in addition, the sub-fund may be subject to the following risks:

Counterparty risk: The sub-fund could lose money if an entity with which it does business becomes unwilling or unable to honour its obligations to the sub-fund.

Currency risk: Changes in currency exchange rates could adversely affect sub-fund performance.

Default risk: The issuers of certain bonds could become unable to make payments on their bonds.

Liquidity risk: During difficult market conditions, some securities may become hard to value or sell at a desired price.

Management risk: Investment management techniques that have worked well in normal market conditions could prove ineffective or detrimental in extreme market conditions.
